

강의계획서

1. 교과목 개요

가. 교과목명 (학수번호, 이수구분 등) : English Writing 2 (A01687203)

나. 담당교수 : David Kellogg

다. 교과목 학습목표

Welcome! This is a class in English writing for both English and non-English majors. As you'd expect, the form of the class is English writing (and I will mostly speak in English too). But the content of the class is going to be work from your other classes—literature, languages other than English, and even political science and economics. You'll bring material that you find interesting from your other classes and you will learn to cite, quote, and comment on what you are doing in your OTHER classes—English and non-English classes—in English.

Just as citing and quoting is not simply a matter of using quotation marks, commenting is not just a matter of saying what you think. We'll look at three kinds of commenting called elaboration ('in other words'), extension ('and another thing') and enhancement (cause and consequence, reason and result, manner, means and circumstance). Above all, we'll look at how to structure what you have to say—in sentences, in paragraphs, and beyond.

라. 강의 방법 및 자료 매체 (판서 모니터, PPT, 워드문서, 인터넷 등) : There's a weekly agenda on the e-class.

마. 교재 및 참고문헌 : This class will be mostly tutorial, so you will provide the main content through the e-class, by writing every week. There is a reference grammar, but it's expensive: I'll make parts of it available on line. There are, therefore, no required textbooks.

2. 주차별 수업 운영 계획(중간.기말고사 제외)

주 차 (week)	강의범위 및 내용 (contents)	비 고 (further information)
1	1st Week Introduction: Expansions and Projections. (Homework: Get some data--a quotation from a textbook in one of your other classes will do just fine!)	
2	2nd Week: Parataxis, hypotaxis, embedding (Homework: Introduce WHO says WHAT and WHY in your data in a single sentence) .	
3	3rd Week: Elaboration One: Expanding by rephrasing the data (Homework: elaborating on data through paraphrase, clarification, exemplification). (Homework: write a paragraph elaborating your data.)	
4	4th Week: Elaboration Two: Expanding by exemplification (Homework: Find an example of the point the text is making, preferably from your own or proximal experience)	
5	5th Week: First Trid-term: A 'data sandwich'. You will need to present a 'sandwiched' quotation--that is, an introduction that says who says what to whom and why, a quotation, and an elaboration (paraphrase and example).	
6	6th Week: Extension One: Adding on to your trid-term. (Homework: You need to find another, related piece of data that makes a similar point.)	
7	7th Week: Extension Two: Adding by variation, alternation, and replacement. You need to introduce and elaborate your new data, and link it in some way to the old 'sandwich' (your trid-term!)	
8	8th Week: Enhancement One. Expanding the circumstances: setting the scene, creating the characters, and posing the problem of the data. (Homework: writing a 'MAP' paragraph which explains what you are going to do.)	
9	9th Week: Enhancement Two: Narration. Explaining causes and consequences, reasons and results, manner and means. (Homework: Writing a summary conclusion of what you've done with your data.)	

10	Second Trid-term: A sandwich of sandwiches. Put all of the homework assignments together and we evaluate the result.	
11	11th Week: Projection One. Locutions and wordings. (Homework: MLA, APA, and Chicago referencing styles.)	
12	12th Week: Projection Two: Facts and thoughts. (Homework: paraphrasing whole abstracts).	
13	13th Week: Projection Three: Reporting beliefs, counter-beliefs, arguments, and counter-arguments. (Homework: extending authors by replacement and variation.)	
14	14th Week: Projection Four: The Five World Rule. (Homework: Protecting yourself from the charge of plagiarism by using INDIRECT speech.)	
15	15th Week: Putting it All Together. In this week we'll look at MECHANICS: the five word rule that prevents plagiarism, the STUD rule which makes sure that every singular noun has a determiner, and other rules on the use of conjunctions, cohesion, and coherence.
