## 강의 개요

This course provides a foundation in the use of correct dental terminology and oral structures. The student gains the basic knowledge required before entering a clinical site (dental office).

## 강의 목표

1. Use the correct terminology when identifying the landmarks and features of the teeth and surrounding structures.
2. Explain the differences among primary, permanent, and mixed dentitions and describe the general and specific features of each.
3. Demonstrate knowledge of the location of each primary and permanent tooth.
4. Designate teeth using the Universal system, Palmer Notation system, and the ISO/FDI system.
