교과목 해설	<p>Financial decision-making in the corporation and analytical techniques for solving financial problems are examined in this course. Financial decisions such as investing in fixed assets, obtaining debt and equity funds, and determining the proper amount of working capital are considered. Problems and cases are used to demonstrate the applicability of the analytical techniques.</p>						
강의진행 방법	<p>The course introduces financial concepts, terminologies and analysis. It provides a basic framework and principle for analyzing financial circumstances with emphasis on the investment and financing decisions of corporations. Topics include time value of money, capital budgeting techniques, risk-return trade-off, cost of capital, valuation of financial securities, and capital structure policy among others.</p> <p>The objective of this course is two-fold. One is to provide the students with the basic concepts and techniques for analyzing financial circumstances from the perspective of corporations. The other is to help the students to understand and communicate with the capital markets and senior or top management people.</p>
