## 거시경제 1: 국민소득과 물가

(subject to revision; last updated on January 26, 2016)

## 1. Introduction

본 과목은 거시경제학의 기초이론들과 응융방법들을 소개/설명한다. 뿐만 아니라, 중앙은행의 통화정책과 정책의 효과를 논의한다. 따라서, 본 과목은 거시경제학의 이론과 응융기법을 통하여 학생들이 여러가지 거시경제의 중요한 현상들을 (예를 들어, 경제의 장기적 성장 추세와 단기적 경기변동) 이해하고 분석할 수 있는 능력을 갖출수 있도록 한다. 참고: 본 과목은 한국어 전용강의입니다. 단지, 강의노트가 영어로 되어 있을 뿐입니다.

(1) These topics will be updated over time. More importantly, we may or may not be able to cover all the topics listed above or updated.
(2) My lecture slides will be posted at the HY-in.

## 4. Grading

| Type of Assessment Tasks/Activities | Weighting |
| :--- | :---: |
| Class-participation | $5 \%$ |
| Problem Set Assignments | $10 \%$ |
| Midterm Examination | $40 \%$ |
| Final Examination | $45 \%$ |

(1) Both the midterm and final examinations will be closed-book ones. In particular, the final examination will cover all the topics covered during the course, but will focus on lectures after the midterm examination. There will be no make-up examinations. In the case that you miss an examination, you don't get any weight assigned to it.
(2) Four to five problem sets will be assigned during the course. They can be done either individually or in a group of two to four people. Handwriting should be clear to everyone, which might encourage you to use a word processor for reporting your answers. Assignments will be collected in lecture on the appropriate date. Late assignments will not be accepted for credit. The problem sets are an integral part of the course. Although they do not constitute a large portion of the final grade, I strongly encourage you to do them in a timely, serious fashion. The problem sets provide valuable information regarding your grasp of the concepts and help you prepare for exams.
(3) Class-participation means your attendance of lectures as well as discussion.
