수업목표 This course is designed to give a broad introduction to applied linguistics (focusing on English). The students will be introduced to the relevant concepts and topics in applied linguistics as research areas that pursue theoretical and experimental investigation of various aspects of language and language use. Topics will cover second language acquisition, foreign language learning/teaching, language assessment, psycholinguistics, sociolinguistics, etc.

수업방법 Lecture and student presentation

평가방법 Grading will be based on attendance, two quizzes, two homework assignments, two exams and a class presentation
