과목명	How to Get the Job that You Really Want
강의목표	1. To guide the students on how to prepare themselves for the job market 2. To provide the students with insights on how to get the job that they really want. 3. To motivate those who are already working with tips on how to get promoted to the job that they really want
강좌개발 계획 및 전략	Some college students choose a course without really knowing what kind of job they really want to have in the future. In addition, there are students who study without having a clear goal of who or what to become someday. A goal is very important for every student since the goal sets the direction for everyone. On the other hand, there are situations where after graduation students might get their first job, which is not exactly what they have hoped for. Unfortunately, this is usually the case. But the good news is that there are ways that both students and current workers can do in order to get the job that they really dream of. This online course provides guidance on things that we can do in order to get the job that we really want. It includes tips for both students and even those who are

	currently working already. This course includes ways on how to prepare yourself to the job market, strategies for self-improvement, and using your strengths in order to move closer to your desired job.　There would be a short quiz at the end of every lesson and a midterm and final assessment as well.
공개강의 적합성	Generally, this course aims to increase the students' access to high quality learning materials.　Specifically, this course aims to guide the students and even current workers and employees on things to be done in order to get the job that they really want.　This course is very appropriate for an online course to enable the students to learn the material in the most convenient manner and time.
강좌 활용계획	온·오프라인 강좌로 활용 - 차후 강의시 온오프라인으로 활용 - 플립러닝 교육방법 적용 - 블렌디드 러닝 교육방법 적용
